1 ECA4.6

1.1 FX series

Figure 1: Front view of ECA-FX Series

Power Button	Press to power up the ECA
HeartBeat Illuminator (Power LED)	LED indicator for power and display the status of the ECA operation state
Security Key port	Port for ECA Security Key (USB type), which is used for authentication purposes to access ecaOS Dashboard
Hot-swap over-temp warning indicator	The LED will light up if the temperature in Hard Disk Drive (HDD) bay(s) exceeds 55°C
Hot-swap fan error indicator	The LED will light up if hot the is error with the hot-swap fan, such as: fan not detected or fan failed.
Bay 1 ~ Bay 15	HDD bays for up to 15 units of 3.5-inch SATA HDDs.

Figure 2: Rear view of ECA-FX Series

1.2 EX series

Figure 3: Front view of ECA-EX Series

Power Button	Press to power up the ECA
HeartBeat Illuminator (Power LED)	LED indicator for power and display the status of the ECA operation state
Security Key port	Port for ECA Security Key (USB type), which is used for authentication purposes to access ecaOS Dashboard
Hot-swap over-temp warning indicator	The LED will light up if the temperature in Hard Disk Drive (HDD) bay(s) exceeds 55°C
Hot-swap fan error indicator	The LED will light up if hot the is error with the hot-swap fan, such as: fan not detected or fan failed.
Bay 1 ~ Bay 10	HDD bays for up to 10 units of 3.5-inch SATA HDDs.

Figure 4: Rear view of ECA-EX Series

1.3 DX series

Figure 5: Front view of ECA-DX Series

Power Button	Press to power up the ECA
HeartBeat Illuminator (Power LED)	LED indicator for power and display the status of the ECA operation state
Security Key port	Port for ECA Security Key (USB type), which is used for authentication purposes to access ecaOS Dashboard
Hot-swap over-temp warning indicator	The LED will light up if the temperature in Hard Disk Drive (HDD) bay(s) exceeds 55°C
Hot-swap fan error indicator	The LED will light up if hot the is error with the hot-swap fan, such as: fan not detected or fan failed.
Bay 1 ~ Bay 5	HDD bays for up to 5 units of 3.5-inch SATA HDDs.

Figure 6: Rear view of ECA-DX Series

1.4 MX series

Figure 7: Front view of ECA-MX Series

Power Button	Press to power up the ECA
HeartBeat Illuminator (Power LED)	LED indicator for power and display the status of the ECA operation state
Security Key port	Port for ECA Security Key (USB type), which is used for authentication purposes to access ecaOS Dashboard

Figure 8: Rear view of ECA-MX Series

1.5 VW series

Figure 9: Front view of ECA-VW Series

Figure 10: Front view of ECA-VW Series

1.6 ECA with redundant PSU

Figure 11: Rear view of ECA with redundant PSU

1.7 Security Keys

Security Keys are required for gaining authenticated access to ecaOS Dashboard.

There are two types of Security Keys:

- USB Security Key
- Virtual Key (Virtual Access Code)

USB Security Key

Security Key is uniquely designed USB key which is paired to the ECA. It can only be used with the paired ECA. If the key is lost, a new key can be issued by GSF and the paired ECA will automatically reject the usage of the lost key, should they be recovered later.

Virtual Key

Virtual Access Code is used for gaining authenticated access to ecaOS Dashboard without requiring the use of security key.

Authenticator app, such as Google Authenticator is required to install on your phone or tablet device such as phone.

When to use Virtual Access code?

1. Accessing ecaOS Dashboard without possession of Security Key
2. Access ecaOS Dashboard remotely from another computer.

2 Heartbeat

2.1 What is Heartbeat?

HeartBeat is around the clock hardware safeguard. Its micro controller overlooks the whole hardware platform to ensure continuous operation even in the event of critical breakdown.

In the event the server fails, it will send help signal via digital I/O or can be connect to CMS Alarm.

2.2 In what event will the HeartBeat react?

Event	HeartBeat's action
Unauthorized Shutdown	Reboot the ECA
Unauthorized Power Unplug	Produce beep tone
ECA not responding	Forces system reboot after 2 minutes
Blue screen of death (BSOD)	Forces reboot after 2 minutes

2.3 ECA Power LED Indicator

LED Status	ECA Scenario	Description
Slow glow and dim (Breathing pattern)	System in Operating System (OS)	System is running in normal operational state
Blinking	While ECA is OFF While ECA is rebooting While System running is OK	HeartBeat battery charge is low. ECA is in a rebooting state HeartBeat is not ready yet.

To view examples of LED indication demonstration, click the link below:

<https://www.gsfcorp.com/downloads/ece-hb-led.gif>

2.4 HeartBeat Alert Tones and Behaviours

Scenario	Beep Tones and Patterns	ECA State	Events	Action Required
1	1 short beep 	Power Up	ECA is booting up	None
2	1 short beep 	ECA is OFF	Authorized shutdown	None
3	1 short beep 	ECA is OFF	AC power cord is removed (planned) Switch OFF power supply (Toggle switch to 'O' position).	None

Scenario	Beep Tones and Patterns	ECA State	Events	Action Required
4	1 short beep 	ECA is OFF	Switch ON Power Supply (Toggle switch to 'I' Position) AC Power resume	None
5	1 short beep 	ECA is ON or OFF state	Closing chassis cover	None
6	2 beeps → 3 high-pitch beeps (repeat after 10 seconds) 	ECA is ON or OFF state	Opening chassis cover	Close the chassis cover
7	4 escalating beeps 	In operating system or Layer Manager	HeartBeat successfully connected to the OS or Layer Manager	None
8	3 high-pitch short beeps (repeat after 10 seconds) 	Booting up; In Operating System	System has shutdown or rebooted 3 times or more within 30 minutes	Shutdown the ECA to mute the alert
9	1 beep, 3 beeps then 2 short beeps x2, followed by 3 beeps (reports after 10 seconds) 	ECA is ON	Power Lost	Power up the ECA
10	1 beep, followed by 2 beeps x2	ECA is OFF	Power supply is switched OFF (Switch is toggled to 'O' position)	None
11	No Beep	ECA is ON	ECA cannot be shutdown using power button or Windows shutdown button	Expected behaviour. Please shutdown the ECA using authorized method

Note:

- For Scenario 8, shutting down the ECA will mute the beep (either authorized or unauthorized method).
 - Authorized shutdown : Shutting down the ECA via ecaOS Dashboard
 - Unauthorized shutdown : Shutting down the ECA via shutdown in Windows Start Menu, or Forcing shutdown by long-pressing ECA power button on the front panel.
- For Scenario 6, closing Chassis cover will mute the beep.
- For Scenario 9, resuming the AC power to ECA will mute the beep.

3 Rail

3.1 Equipment Rack Requirement

Before beginning with the installation, it is important to make sure the equipment rack you are using fulfills the following rack depth. Usage of improper rack size may result in injury.

The depth for equipment rack, shall have its front-to-rear vertical mounting columns, measures at minimum **600mm** gap distance.

To avoid injury, it is strongly recommended that the installation shall be done by two persons.

**Note: The above requirement is based on rail part number: King Slide A68-583BPZZ11ED.*

3.2 Package Content

Content	Description	Quantity
	Sliding Rail	2
	CH Screw	2
	SL Screw	8
	CL Screw	6
	RK Nut	10

3.3 Sliding Rail Assembly

The Sliding Rail assembly is comprised of 3 parts:

- Inner Rail
- Slide Rail
- Rail Bracket

3.4 Installation Procedure

Step 1: Detach the Inner Rail from the Sliding Rail assembly.

Extend the parts of the Sliding rail to reveal the WHITE color latch on the Inner Rail.

Pull and hold the **WHITE** color latch outwards, while simultaneously pulling the Inner Rail in an outward direction. This shall remove the Inner Rail from the assembly.

DO NOT remove the Slide rail from the Rail assembly. It is **NOT** removable.

Step 2: Attach Inner Rail to ECA Chassis.

Step 3: Insert the RK Nuts to Equipment Rack or Server Rack.

- Before inserting the nuts, make sure to reserve total 4U height and spacing for every ECA.
- The Sliding Rail is attached to the lowest 1U on the ECA.

- Ensure above the sliding rail, there is another 3U clearance space for the ECA.
- Take note of proper and correct spacing for 1U height

Step 4: Install the Rail Brackets to the Equipment rack or Server Rack. Place the Rail Brackets to the same level as the RK nuts, inserted in the previous step. Use SL screws and fasten them to the nuts. For the front, **DO NOT fasten any screw to the middle nut**. The middle nut is reserved for fastening the ECA.

Step 5: Carry the ECA, which now has the Inner Rails attached, and ensure both Inner Rails are securely inserted into the Sliding Rail.

Step 6: Push the ECA inwards to the rack until the mounting brackets encounter the slide-rail stop. Then, simultaneously pull and hold the **BLUE** latch on the Inner Rail, while pushing the ECA inwards. This will fully contract the whole Sliding Rail assembly.

Step 7: The ECA, with the Sliding Rail at full contracted position, shall look like this:

Step 8: Lift the screw cover on the earpiece of the ECA. Fasten ECA to the Sliding Rail using the CH Screw.

4 ECA Naming

The ECA naming will represent the specification of the platform.

5 ECA Series

Series	VW	MX	DX	EX	FX
Mount	Tower or Rack	Rack	Rack	Rack	Rack
Storage	Internal: Up to 3 HDDs	Internal: Up to 3 HDDs	Hot-swap: 5 HDDs	Hot-swap: 10 HDDs	Hot-swap: 15 HDDs
			Internal: Up to 2 HDDs	Internal: 1 HDD	Internal: None
Hot-swap Bay	None	None	5	10	15
Redundant Storage System (RSS)	No	Yes	Yes	Yes	Yes
Recommended Usage	Video Workstation	Recording Server	Recording Server	Recording Server	Recording Server
HeartBeat	No	Yes	Yes	Yes	Yes

6 ecaOS

ecaOS is a protected operating system environment, equipped with a unique and practical feature called Triple Layers, essential for both reliable and secure operation of the ECA.

Its ability to Soft Reset within few minutes significantly reduces system down time in the event of, though rare, system disaster, such as corrupted Video Management Software or misconfiguration.

Layer	Description
User Layer <i>Current working layer</i>	This is a normal user operation layer with a protected OS environment, any system changes without using the Embedded Security Key will be discarded after system reboot (Fast Reset)
Deployment Layer <i>Backup Layer</i>	This is a good working state layer, usually saved by System Integrator with pre-configured NVR & camera settings
Factory Layer <i>Backup Layer</i>	This is a good working state layer, with original default settings shipped from factory

6.1 ecaOS Login

Some ECA may be shipped without automatic login, subject to configurations. In such case, the ecaOS prompt for OS login, as follow:

Figure 12: ecaOS Login Screen

Please contact **TrueBlue Support** to obtain the login credentials:

Email : trueblue@gsfcorp.com

Contact number : +60-3-80908277

Information to provide:

- Digital Certificate number of the ECA, usually can be found on the front panel of the ECA, and starts with **DC20XXXXXXXXXX** (14-digits)
- End-user's name

6.2 ecaOS Locked Out

if the password is incorrect for 3 times consecutively, the login screen will lock for 15 minutes, before allowing retry.

Figure 13: Account Locked Out

7 Dashboard and Notification

Location of the Dashboard application and ecaOS Notification display area.

Figure 14: ecaOS Desktop

Notification	Where all the activities within the ECA will be prompted out
Dashboard	A web-based interface displaying overall information and system vitals of the ECA machine status

7.1 Accessing ecaOS Dashboard

There are two ways to access ecaOS Dashboard.

1. Security Key (USB type)
2. Virtual Security Key (card with QR code)

Figure 15: Security Key & Virtual Security Key Card

7.2 How to use Security Key (USB)

1. Insert Security Key to **SECURITY KEY** port on front panel of ECA.

Figure 16: Security Key USB Port Location

2. Run 'ecaOS Dashboard'  from Taskbar.

7.3 How to use Virtual Security Key (ECA Access Code)

1. Run 'ecaOS Dashboard'  from Taskbar.
2. Enter **Access Code** from authenticator apps.

Figure 17: Dashboard Login Page

7.4 Get Virtual Security Key (ECA Access Code)

ECA Access code is mandatory for logging into the Dashboard. To obtain the ECA Access code, follow the procedures below:

1. Download an Authenticator app.
 - For **Android** user, go to **Google Play**.
 - For **iOS** user, go to **App Store**.
2. Search for 'authenticator'. Then, **Google Authenticator** or **Microsoft Authenticator** should appear in the result. You can install either one as the authenticator to use with ecaOS for obtaining the Access code.

Figure 18: App search results

3. The following procedure is based on using Google Authenticator.

Before using an authenticator app, ensure that your device's time is synchronized with ECA's time. If it is not, the code may not work correctly

4. Run Google Authenticator on your device. Click **Begin** button.

Figure 19: Authenticator Setup

5. Choose **Scan a barcode** to start scanning the QR code found on the Virtual Security Key card.

Figure 20: Authenticator Setup

6. Ensure the QR code is positioned correctly within the scanner frame.

Figure 21: Authenticator Setup

7. Once successful, the Access code will display in the app.

Figure 22: Authenticator Setup (4 of 4)

1. Access Code
2. Access Code will change for every 30 seconds
3. Click here to scan another QR Code for others ECA 'Virtual Security Key'.

8. Enter the 6-digits One-Time-Passcode (OTP) access code into the Security Key Verification page (ecaOS Dashboard login page).

Figure 23: ecaOS Dashboard Login Page

7.5 Accessing ecaOS Dashboard Remotely

1. Open web browser on the remote computer.
2. In the web browser's address bar, enter the IP address of the ECA, in this format:

`https://<ipaddress>`

Example: <https://10.0.0.39>

Alternatively, you may also insert the ECA's Digital Certificate (DC number), also known as the serial number, in the following format:

`https://<ECA serial number>`

Example: <https://DC200012340005>

Default access port number for ecaOS Dashboard is **443**. This port number is customizable in the Dashboard configuration.

3. Click **Advanced**.

Figure 24: Dashboard Remote Access (1 of 2)

- Click the link **Continue to dcxxxxxxxxxx (unsafe)**

Figure 25: Dashboard Remote Access (2 of 2)

7.6 Dashboards

The Dashboards shows overall information about the ECA machine and some of its system vitals. The information is summarized in a card style display.

Example of information and status display in the Dashboards are:

Figure 26: ecaOS Dashboards

8 Applications

8.1 System Monitor

System Monitor provides users with real-time information on Processor Temperature, Mainboard Temperature, PSU Temperature*, Processor and System Fan Speeds, as well as 3.3V System Voltage, 12V System Voltage, and Mainboard Battery Voltage.

 *Only applicable to ECA4.5 and above, with TBSP-ECAPSE-R600 power supply unit (PSU).

Figure 29: Processor Temperature monitor

Figure 34: 12V System Voltage Monitor

Figure 35: Mainboard Battery Voltage monitor

Figure 36: PSU Temperature monitor* (only applicable with TBSP-ECAPSE-R600 PSU).

8.2 App Monitor

The App Monitor displays the status of applications tracked by the Application Monitor, as well as services within ecaOS that have been included in the Service Monitor.

Figure 37: Service Monitor Summary

8.2.1 Add Application

1. To add application, click the Add Application button.

Figure 38: Add Applications

2. Enter the application name

Figure 39: Application Monitor (1 of 4)

3. Insert the path to the application to be added. Then, press **Next**.

Figure 40: Application Monitor (2 of 4)

4. Apply setting

Figure 41: Application Monitor (3 of 4)

Settings	What it does
Upon first execution delay for	Set the delay before starting the application
If other instance(s) are already running, terminate them	If another instance of the same application is already started (not by Application Manager) terminate that instance.
Terminate other instance(s) throughout the entire session	If another instance attempts to start again after the Application Monitor has started the application, terminate it. This prevents duplicated instance.
Terminate application if it does not respond after __ attempts	If the application does not respond after the number of attempts specified, the Application Monitor will terminate it.
Respawn application	The Application Monitor will respawn the application if it is not running, or if it is closed. This ensures the application is always running.

- Once the application has been successfully added, its status will appear on the 'Application Monitor'

Figure 42: Application Monitor (4 of 4)

8.2.2 Delete Application

- To delete application to be monitor, click the  button of the application to be delete

Figure 43: Delete monitored application (1 of 2)

- Click on  to proceed with the deletion

Figure 44: Delete monitored application (2 of 2)

8.2.3 Add Services

1. To add services, click the Add Service button.

Figure 45: Add Services

2. Click the drop-down button.

Figure 46: Select Windows Services (1 of 4)

3. Select the services to be added into Service Monitor.

Figure 47: Select Windows Services (2 of 4)

4. Click **Next →** button

5. Select the actions that Service Monitor should perform when the services stop working. Click **Save** to save the setting.

Figure 48: Select Windows Services (4 of 4)

8.2.4

Delete Services

1. To delete services, click the  button of the service to be deleted.

Figure 49: Delete Services (1 of 2)

2. Click on  to proceed with the deletion.

Figure 50: Delete Services (2 of 2)

8.3 System Activity

8.3.1 Processor Activity

Processor Activity monitors CPU usage and notify via email when the usage above the threshold value.

ecaOS can generate notification to alert users, when ECA CPU Alert utilization goes above the configured threshold for a pre-defined period.

Average Utilization ①: The status will be based on Average CPU Utilization. The status will change to **High** if average CPU Utilization exceeds the threshold set under **Processor Activity Monitor ②**.

Figure 51: Processor Activity (1 of 2)

The example below demonstrates the Processor Activity Monitor configured with a threshold of 50% over 10 minutes. If the average Processor utilization exceeds 50% for more than 10 minutes, the CPU activity status will change to "High." This event will trigger an email notification and an alert in the notifications panel.

Figure 52: Processor Activity (2 of 2)

NOTE:

- Click on **Use Suggested** for recommended value calculated by the system based on real-time usage.

- For email and notification setting, go to [Settings](#)
- Sample email of the Processor activity event can be found in the [Appendix Processor Activity](#)

8.3.2 Memory Activity

Monitor the memory usage and notify/email if the usage above the threshold value. ecaOS can generate notification to alert users when ECA Memory utilization goes above the configured threshold for a pre-defined period.

Memory Activity: The status will be based on Average Memory Usage. The status will change to High if the Average Memory Usage is higher than threshold set under Memory Activity Monitor.

Figure 53: Memory Activity (1 of 2)

The example below to demonstrate that the Memory Activity Monitor set to enable, the threshold set to 50% for 5 minutes. The Memory Activity status will change to High if the Average Memory Utilization is higher than 50% for more than 5 minutes. This event will be notified by email and at the notification.

Figure 54: Memory Activity (2 of 2)

NOTE:

- Click on 'Use Suggested' for reference value calculated by the system.

- For email and notification setting, go to [Settings](#)
- Example email of the Memory activity event in the [Appendix Memory Activity](#)

8.3.3 Disk Activity

Disk Activity provides real-time monitoring of disk usage, tracking average activity per minute, hour, and day. It includes automatic alerts if disk read or write activity deviates above or below predefined threshold limits for a specified duration. This feature is particularly useful for detecting issues such as accidental deactivation of the recording function in VMS software. When recording is turned off, disk writing ceases, prompting the system to alert users of potential CCTV recording interruptions.

Figure 55: Disk Activity (1 of 2)

The following example demonstrates the configuration of the Disk Activity Monitor for both read and write operations.

The average disk read threshold is set to exceed 1 MB/s for 5 minutes, while the average disk write threshold is configured to drop below 22 MB/s for the same duration. If these thresholds are exceeded, the system will send a notification via email and display an alert in the notification panel.

Figure 56: Disk Activity (2 of 2)

NOTE:

- Click on 'Use Suggested' for reference value calculated by the system.
- For email and notification setting, go to [Settings](#)
- Example email of the Disk activity event in the [Appendix Disk Activity](#)

8.3.4 Network Activity

Network Activity displays real time network usage activity. It can automatically calculate average network utilization per minute, per hour or per day. This average value is important for the estimation and observation of network utilization, as incoming throughput from the network cameras or video sources varies throughout the day, where daytime throughput is usually higher than nighttime.

Automatic alert if network received or sending is fall or raise above threshold limit for a period of time. This is very useful if some of the cameras was accidentally offline due to faulty PoE switch.

Figure 57: Network Activity (1 of 2)

By the example below to demonstrate that the Network Activity set to trigger email & desktop notifications.

Figure 58: Network Activity (2 of 2)

It will trigger when the data send over network above 4 Mbps for 5 minutes

It will trigger when the data receive below set threshold 226 Mbps for 5 minutes

NOTE:

- Click on 'Use Suggested' for reference value calculate by the system.
- For email and notification setting, go to [Settings](#)
- Example email of the Network activity event in the [Appendix Network Activity](#)

8.4 Storage Monitor

The "Storage Monitor" can provide details about every disk that is connected to the ECA.

Figure 59: Storage Monitor

8.4.1 Volumes

All of the available volumes will be placed here under the Volumes tab.

In figure 60, showing four volumes together with their respective usage bars. DataSpace (F:) is an RSS storage, it spans across Bays 1, 4, and 5, and already consumed 83.15% of its available space. New Volume (G:) is located in Bay 10 and currently unused.

Figure 60: Storage Monitor – Volumes

8.4.2 Disks

Display status all connected hard disk to the ECA.

HDD stores important video evidence data. It is important to ensure the data remains intact in the ECA. HDD insertion and removal events on the ECA are tracked by Storage Monitor. Additionally, it keeps track of disk health and alerts users when it falls below a predetermined threshold.

Details about the disk in the Disks tab:

- HDD Model, Serial number, Firmware
- HDD Status, Temperature, Power up time
- HDD volume information
- Disk Guard status
 - **Online:** Hard disk installed. Using by OS
 - **Offline:** Hard disk installed. Not using by OS
 - **No Disk:** No hard disk installed.
 - **Removed:** Previous hard disk has been removed.
 - **Replaced:** Hard disk has been replaced with different serial number.

Figure 61: Storage Monitor – Disks

Disk list shown depending on the ECA model:

- ECA-FX46: System Disk, Bay 1 – Bay 15
- ECA-EX46: System Disk, Bay 1 – Bay 10 & HD1
- ECA-DX46: System Disk, Bay 1 – Bay 5, HDD1, HDD 2
- ECA-MX46: System Disk, HDD1, HDD 2
- ECA-VW44: System Disk, HDD1, HDD 2

NOTE:

- System Disk is the drive containing operating system.

- Hard disks insert in the hotswap bay will label shows as a 'Bay'.
- Internal hard disk will label HDD1 & HDD2 is for the internal hard disk.
- When hard disk removed, the hard disk information still shown with 'Removed' status. Acknowledge the removed hard disk will change to latest status.

Figure 62: Disk removed

8.4.3 S.M.A.R.T.

Under S.M.A.R.T (Self-Monitoring, Analysis and Reporting Technology), will display S.M.A.R.T value. Its primary function is to detect and report various indicators of drive reliability with the intent of anticipating imminent hardware failures.

ID	Attribute Name	Flags	Current	Worst	Threshold	Raw Value	Status
1	Raw Read Error Rate	47	100	100	0	5	OK

8.4.4 Hard disk change during ECA Power Off

Dashboard will be sending notification via email to inform there is hard disk changing during ECA off stage (power off). This feature is part of Disk Guard, to protect the Data/Evidence, ensure the same serial number was in the ECA machine before and after power on.

Figure 64: Hard Disks change detected (1 of 1)

8.5 Session Shield

Session shield which permanently stores all modifications into the User Layer. Without doing so, all modifications of settings, software, or Windows, are temporary only, and will be discarded once the ECA is powered off or reboot.

Total size availability will be half of the amount of the RAM.

Figure 65: Session Shield

8.5.1 Activate Session Shield

All setting/files in the 'C:\' will be protected. All setting/files will be return to its original state after reboot the ECA.

1. Click on 'Activate'

Figure 66: Activate Session Shield (1 of 5)

2. Click 'Change Settings' to save the setting

Figure 67: Activate Session Shield (2 of 5)

3. Click 'Restart' to reboot ECA and apply the setting.

Figure 68: Activate Session Shield (4 of 6)

4. Type Restart then click 'Restart' button

Figure 69: Activate Session Shield (5 of 6)

5. Once the Session Shield successfully activated. The Session Shield information shown as below

Figure 70: Activate Session Shield (6 of 6)

8.5.2 Deactivate Session Shield

All setting/files in the 'C:\' will not be protected. All files setting will be permanently written.

1. Click on 'Deactivate'

Figure 71: Deactivate Session Shield (1 of 3)

2. Click 'Change Settings' to save the setting

Figure 72: Deactivate Session Shield (2 of 3)

3. Click 'Restart' to reboot ECA and apply the setting

Figure 73: Deactivate Session Shield (2 of)

4. Type Restart then click 'Restart' button

Figure 74: Deactivate Session Shield (3 of 3)

8.5.3 Exclusion List

All paths below will not be affected when Session Shield is activated. The data destined to these paths will be able to pass-through and written permanently:

8.5.4 Add Exclusion Files or Folder

New files or folder can be added in the Exclusion List will be allowed to be written permanently when the 'Session Shield' is activated.

1. Click 'Add Exclusion' to add new file/folder

Figure 75: Allow Files/Folder (1 of 3)

2. Type or paste the new files/folder path to be include and click 'Exclude'

Figure 76: Allow Files/Folder (2 of 3)

Figure 77: Allow Files/Folder (3 of 3)

8.5.5 Delete Exclusion Files or folder

1. Tick the check box which files/folder to be delete from the exclusion list and click 'Delete Selected'

Figure 78: Delete Files/Folder (1 of 3)

2. Click 'Delete Exclusion' to confirm the operation

Figure 79: Delete Files/Folder (2 of 2)

8.5.6 Add Registry Keys

Allow to be written permanently when the 'Shield' is activated.

1. Click 'Add Exclusion' to add registry keys

Figure 80: Allow Registry Keys (1 of 2)

2. Type or paste the registry key to be include and click 'Exclude'

Figure 81: Allow Registry Keys (1 of 2)

8.5.7 Delete Exclusion Registry Key

1. Tick the check box which registry key to be delete from the exclusion list and click 'Delete Selected'

Figure 82: Delete Registry Key (1 of 2)

2. Click 'Delete Exclusion' to confirm the operation

Figure 83: Delete Registry Key (2 of 2)

8.5.8 Status: Warning

Session shield status will turn to 'Warning' state when the used amount of space exceeds 80% of total space.

Figure 84: Warning Status

8.5.9 Status: Critical

Session shield status will turn to 'Critical state when the used amount of space exceeds 90% of total space. The ECA will be start the counter and restart in few minutes.

Figure 85: Critical Status

8.6 Device Monitor

Device Monitor is a tool to monitor the uptime percentage of a device of interest using HTTP, Keyword, Port or Ping methods.

Figure 86: Device Monitor

8.6.1 Add New Monitor

1. Click the 'Add new monitor'.

Figure 87: Add new monitor

2. Choose the desired monitor type under "Add monitor details."
3. HTTP – monitors a web server using HTTP or HTTPS. GET, POST, HEAD, and OPTIONS are supported HTTP methods.
 - a. Type in the hostname or IP and monitor name.
 - b. Pick the appropriate HTTP Method. (GET Method by default)
 - c. Set the Monitoring Interval. (by default, five minutes)
 - d. Press the Submit button.

Figure 88: Monitor type - HTTP

4. Keyword – monitors a web server (HTTP or HTTPS) using keyword.
 - a. Type in the hostname or IP and monitor name.
 - b. Enter a keyword to monitor. (Case-sensitive by default)
 - c. Set the Monitor Up when keyword “Found or “Not Found” (default: Found)
 - d. Set the Monitoring Interval. (by default, five minutes)
 - e. Press the Submit button.

Figure 89: Monitor type - Keyword

5. Ping - sends an “ICMP” echo request ("ping") to the device to monitor its availability.
 - a. Type in the Monitor name & Hostname/IP
 - b. Set the Monitoring Interval. (by default, five minutes)
 - c. Press the Submit button.

The screenshot shows the 'Add monitor details' form for a Ping monitor. It includes fields for 'Monitor Name *', 'Hostname/IP *', and a 'Monitoring Interval' slider set to 5 minutes. The 'Monitor Type' dropdown is set to 'Ping'. A 'Submit' button is at the bottom right.

Figure 90: Monitor type - Ping

6. Port - monitors a network service by connecting to its port.
 - a. Type in the Monitor name, Hostname/IP & Port number.
 - b. Set the Monitoring Interval. (by default, five minutes)
 - c. Press the Submit button.

The screenshot shows the 'Add monitor details' form for a Port monitor. It includes fields for 'Monitor Name *', 'Hostname/IP *', and 'Port Number *'. The 'Monitoring Interval' slider is set to 5 minutes. The 'Monitor Type' dropdown is set to 'Port'. A 'Submit' button is at the bottom right.

Figure 91: Add Device Monitor – Port type

8.6.2 Delete Monitor

1. Click 'v' icon and select 'Delete monitors'.

Figure 92: Delete Device Monitors (1 of 2)

2. Select the monitor to delete and type 'Delete'.
3. Press the 'Delete' button.

Figure 93: Delete Device Monitors (2 of 2)

8.7 Recording Monitor

The Recording Monitor is a tool for monitoring the channels recording status of the Macula VMS.

Figure 94: Device Monitor

8.7.1 Add New Monitor

1. Click 'Manage Servers' button.

Figure 95: Add VMS server (1 of 3)

2. Click 'Add Server'.

Figure 96: Add VMS server (2 of 3)

3. Enter VMS's hostname/IP, port, and login information. Please ensure that the user has the channel's 'video playback' and 'Login via HTTP' permissions.

Figure 97: Add VMS server (3 of 3)

4. Click 'Add monitors'.

Figure 98: Add monitors (1 of 2)

5. In 'Add monitor', choose a server and channels to monitor. Then press 'Add' button.

Figure 99: Add monitors (2 of 2)

8.7.2 Delete Monitors

1. Click 'v' icon and select 'Delete monitors'.

Figure 100: Delete Recording Monitors (1 of 2)

2. Select the monitor(s) to delete and type 'Delete'.
3. Press the 'Delete' button.

Figure 101: Delete Recording Monitors (2 of 2)

9 Management

9.1 Machine

Under Machine Control to Reboot or Shutdown ECA. Layer Management to save current layer as a backup layer. Backup layer can be deployed (Soft Reset & Hard Reset) in the future to restore previous setting.

Figure 102: Machine

9.1.1 Authorize Restart

Only restart through the Dashboard will consider as authorize restart.

1. Click on 'Restart'

Figure 103: Authorize Restart (1 of 2)

2. Type **Restart** then click 'Restart' button

Figure 104: Authorize Restart (2 of 2)

9.1.2 Authorize Shutdown

To shutdown ECA, only through the Dashboard will consider as authorize restart. Shutdown ECA not via dashboard will consider as unauthorize shutdown. HB will reboot the ECA.

1. Click on 'Shut Down'

Figure 105: Authorize Shut Down (1 of 2)

2. Type **Shutdown** then click 'shutdown' button

Figure 106: Authorize Shut Down (2 of 2)

9.1.3 Saving & Deploy Layer

It is recommended to perform 'Save Layer' for any changes under system including video management software such as added new camera.

9.1.3.1 Save Layer

Save current user working layer as a deployment layer. This layer will content all current working setting. If in the future suddenly the OS corrupt, this layer can recall (Soft Reset) to deploy previous working state.

NOTE:

Performing Save Layer, Soft Reset & Hard Reset will cause the downtime of the ECA means there will no recording & accessing to Dashboard not available during this period until the ECA complete the layer saving and reboot back to ecaOS.

1. Click on 'Save Layer'

Figure 107: Save Layer (1 of 5)

2. ECA will reboot and go to Layer Manager.

Figure 108: Save Layer (2 of 5)

3. Saving layer will be start after 10 seconds countdown. To cancel the operation, click on Cancel

Figure 109: Save Layer (3 of 5)

4. Saving layer in progress show with percentage

Figure 110: Save Layer (4 of 5)

5. ECA will reboot to ecaOS after complete saving layer.

Figure 111: Save Layer (5 of 5)

9.1.3.2 Soft Reset

Deploy deployment layer and replace current working with previous save setting.

1. Click on 'Soft Reset'

Figure 112: Soft Reset (1 of 5)

6. ECA will reboot and go to Layer Manager.

Figure 113: Save Layer (2 of 5)

7. Restoring Deployment layer will be start after 10 seconds countdown. To cancel the operation, click on Cancel

Figure 114: Save Layer (3 of 5)

8. Restoring layer in progress show with percentage

Figure 115: Save Layer (4 of 5)

9. ECA will reboot to ecaOS after complete saving layer.

Figure 116: Save Layer (5 of 5)

9.1.3.3 Hard Reset

Deploy default layer saved from factory.

NOTE: All setting previously done on site will not available after Hard Reset. Only perform Hard Reset when Soft Reset failed.

1. Click on 'Hard Reset'

Figure 117: Soft Reset (1 of 2)

10. ECA will reboot and go to Layer Manager.

Figure 118: Save Layer (2 of 5)

11. Restoring Factory layer will be start after 10 seconds countdown. To cancel the operation, click on Cancel

Figure 119: Save Layer (3 of 5)

12. Restoring layer in progress show with percentage

Figure 120: Save Layer (4 of 5)

13. ECA will reboot to ecaOS after complete saving layer.

Figure 121: Save Layer (5 of 5)

9.1.3.4 Last Saved Layer Information

Display the last date and time of the layer last saved

Figure 122: Information about the last saved layer

9.1.4 Machine Name

Assign your ECA a friendly name to make it easier to identify.

Figure 123: Machine name for ECA

9.1.5 Change Dashboard Port

By default, port 443 is used by ECA to access the dashboard remotely from a different computer connected to the same local area network. If the default ports are already being used, change this port.

Figure 124: Port settings for Dashboard

9.1.6 ecaCentral Registration

ecaCentral is a dedicated dashboard for monitoring the health and performance of multiple ECAs using a registered email address. If any registered ECAs have anomalies, you will be notified via the ecaCentral dashboard.

Before using ecaCentral, go to the ecaOS dashboard for the ECA you want to monitor: Management > Settings > ecaCentral Registration, and enter your registered account information.

To register your ECA for this service:

- Enter the central IP address or hostname.
- Enter your registered email address.
- Click the Next button.
- Enter the access code generated from your virtual security key to verify and complete the registration.

If you have successfully connected the ecaCentral, you will see the connection status as connected.

Figure 125: ecaOS Central Registration

9.2 Security Key

Each ECA will come with 1 unit of Security key. Any extra Security key or replacement unit require to register the Security Key to access Dashboard.

Figure 126: Security Key

9.2.1 Register Security Key

1. Insert valid Security Key in the USB on the ECA
2. Click on the drop-down list and select the key to register.

Figure 127: Register security key (1 of 3)

3. Click Add to register

Figure 128: Register security key (2 of 3)

- Once successfully added the Security Key. The new security key will show under 'Security keys'

Security Keys						
Name	Id	Type	Last Used	Location	Status	
ecaOS6 Master Key	1c39598b	Master	N/A	E	Inserted	
Showing 1 to 1 of 1 rows

9.2.4 Delete Virtual Security Key

1. Click on the dustbin icon the Virtual key to be delete

Figure 137: Delete Virtual Security Key (1 of 2)

2. Type 'admin' and click on 'Delete Virtual Security Key' button

Figure 138: Delete Virtual Security Key (2 of 2)

9.3 Network

All ECA come with GSF DDNS. Network teaming groups multiple physical adapters together to provide better network fault tolerance.

Figure 139: DDNS and Network Teaming

9.3.1 Enable DDNS

1. Enable GSF DDNS.
2. Enter the correct Update Code and click on 'Save Changes'. Please contact GSF to obtain your update code.

Figure 140: Enable DDNS

9.3.2 Enable Network Teaming

1. Click on the 'Enable' button to enable Network Teaming.

Figure 141: Enable Network Teaming

2. Type 'Confirm' and click on 'Confirm' button

Network Teaming

Changing network teaming will temporarily drop all network connectivity. Confirm?

Type **Confirm** to confirm

Text is case-sensitive.

Figure 142: Confirm to enable network teaming

9.3.3 Disable Network Teaming

1. Click on the 'Disable' button to disable Network Teaming.

Figure 143: Disable Network Teaming

2. Type 'Confirm' and click on 'Confirm' button

Network Teaming

Changing network teaming will temporarily drop all network connectivity. Confirm?

Type **Confirm** to confirm

Text is case-sensitive.

Figure 144: Confirm to disable network teaming

9.4 RSS (Redundant Storage System)

RSS can help protect your data from drive failures. It's a technology in ECA and is conceptually similar to redundant array of independent disks (RAID), implemented in software. You can use RSS to group three or more drives into a storage pool and then use capacity from that pool to create Storage Spaces. These drives typically store extra copies of your data, so if one of your drives fails, you still have an intact copy of your data.

Figure 145: RSS – Redundant Storage System

9.4.1 Create Storage Pool

1. Click on the 'Create Pool' button to create pool.

Figure 146: Create Pool

2. Name the storage pool and click on the 'Next' button.

This screenshot shows the 'Name' form for creating a storage pool. It includes a title 'Name', a prompt 'Please name this storage pool', a text input field containing 'DataPool', and two buttons at the bottom: 'Next' (highlighted with a green border) and 'Cancel'.

Figure 147: Name storage pool

3. Select the non-member physical disks and click on the 'Next' button to create pool.

Figure 148: Select disks

Figure 149: Select disks

- In Virtual Disk Settings, name the virtual disk and select the Resiliency type. Click on the 'Create Volume' to create volume.

Resiliency type	Fault-tolerance for each storage pool	Minimum number of disks	Disk space efficiency
Simple	0 Disk	1	100%
Two-way Mirror	1 Disk	2	50%
Three-way Mirror	2 Disks	5	33%
Single Parity	1 Disk	3 (recommended 5disk for optimized performance)	$\frac{\text{Disk Count} - 1}{\text{Disk Count}}$
Dual Parity	2 Disks	5 (recommended 10disk for optimized performance)	$\frac{\text{Disk Count} - 2}{\text{Disk Count}}$

Figure 150: Resiliency type table

Figure 152: View storage pool, virtual disk health status

9.4.2 Delete Storage Pool

1. Click on the '⋮' and select 'Delete Pool' to delete the pool.

Figure 153: Delete pool

2. Enter storage pool name and click on the 'Delete Pool and Volumes' to delete the pool.

Figure 154: Confirm delete pool

9.4.3 Extend Storage Pool

Add a new non-member disk to extend the storage pool.

1. Insert a new clean disk into the ECA, it will appear under the Non-member Physical Disks list.

Figure 155: RSS non-member physical disks

2. Click on the '⋮' and select 'Extend Pool' to extend the pool.

Figure 156: Extend storage pool

3. Enable Optimize storage pool and click on the 'Extend' button to extend the pool.

Figure 157: Optimize and extend storage pool

- Please wait for the ECA to complete the optimization process.

Figure 158: Optimizing storage pool

- After the RSS optimization process is complete, go to Windows Device Manager to expand the RSS volume.

Figure 159: Extend volume in Disk Management (1 of 2)

Figure 160: Extend volume in Disk Management (2 of 2)

9.4.4 Repair Storage Pool

If any of the RSS member disks are missing or faulty, ecaOS will notify you via email or desktop notification. To repair the storage pool, replace the missing or faulty disk with a new non-member disk.

Figure 161: RSS Degraded

Figure 162: RSS Degraded Desktop notifications

1. To determine which member disks are 'Warning: lost communication,' go to the 'Physical Disks' tab. Then remove the faulty disk from the ECA.

Figure 163: RSS member disk lost communication

2. Insert a new clean disk into the ECA, and then navigate to 'System > Disk Guard' to 'Acknowledge' the new replaced disk.

Bay 10	ST16000NM001G-2KK103	ZL2G0D00	Replaced	Acknowledge
--------	----------------------	----------	----------	-------------

Figure 164: Acknowledge the replacement disk

- Go to Management > RSS, the new replacement disk will be listed under Non-member Physical Disks.

Label	Name	Serial Number	Firmware	Bus Type	Health	RSS Status	Size	Can Pool	Disk Number

9.5.4 SNMP Settings

Users can use an external network management system to receive ECA events via SNMP. To enable the SNMP in ECA, navigate to "Management > Settings > SNMP Settings". The following protocols are currently supported: SNMPv1, SNMPv2c, and SNMPv3.

SNMP Settings

☐ Enable SNMP Agent

[Trap Receivers](#)

Host	Port	SNMP Version	Auth Protocol	Privacy Protocol
No matching records found				

[+ Add Trap Receiver](#)

Figure 189: SNMP Settings

9.5.4.1 Enable SNMP

1. Tick Enable SNMP Agent, click the Add Trap Receiver button and follow the steps below.
 - a. Enter the host IP address.
 - b. Enter the port number of the host.
 - c. Select the SNMP version.
 - d. Enter a community name.
 - e. Click the Save button.

The image shows the 'SNMP Settings' window. At the top, there is a checkbox labeled 'Enable SNMP Agent' which is checked. Below this is a section titled 'Trap Receivers'. It contains a table with columns: Host, Port, SNMP Version, Auth Protocol, and Privacy Protocol. The table is currently empty, displaying 'No matching records found'. At the bottom of the 'Trap Receivers' section, there is a blue button labeled '+ Add Trap Receiver'.

Figure 190: Enable SNMP

The image shows the 'Add Trap Receiver' dialog box. It has a title bar with a pencil icon and the text 'Add Trap Receiver'. The dialog contains the following fields:

- Host:** A text input field containing '10.0.0.153'.
- Port:** A text input field containing '162'.
- SNMP version:** A dropdown menu with 'v2c' selected.
- Community:** A text input field containing 'public'.

 At the bottom right, there are three buttons: 'Close', 'Send test trap', and a green 'Save' button with a floppy disk icon.

Figure 191: Add SNMP Trap Receiver

9.5.4.2 Download ECA MIB Files

GSF provides ECA's management information base (MIB) files; importing these MIB files makes SNMP monitoring easier by labeling raw numeric OIDs with human-readable names.

Please obtain the ECA MIB files from

"C:\Program Files (x86)\GSF\ecaOS\Services\MqttSnmpAgent\MiB.zip".

10 Events

10.1 Notification

The screenshot displays the ECA (Enterprise Cloud Architecture) interface. On the left is a dark sidebar with navigation links: Summary, System, Management, Events, Notifications (selected), Logs, Report, Support, and About. The main content area shows the 'Notifications' page for 'DC201809140003 TestBed-H'. At the top right, there's a notification bell icon with '10+' and a 'Logout' link. The notifications are listed in a table with columns: Time, Name, and Details. Each row starts with a green checkmark icon. The table shows various events such as 'Optimizing storage pool', 'Storage pool extended', 'Extending storage pool', 'Virtual disk created', 'Storage pool created', 'Storage pool deleted', and 'Virtual disk deleted'. At the bottom, there's a pagination bar indicating 'Showing 1 to 10 of 97 rows' and a 'rows per page' dropdown set to '10'. There are also page navigation buttons (1, 2, 3, ..., 10) and a 'GO' button.

Time	Name	Details
28 April 2023, 14:22:53	Optimizing storage pool	Optimizing storage pool 'DataPool'
28 April 2023, 14:22:53	Storage pool extended	Storage pool 'DataPool' extended to 58.2 TB

11 Support

11.1 Microsoft Remote Desktop

Microsoft Remote Desktop app to connect to a remote PC or virtual apps and desktops made available by your admin.

Click on 'Start' button under Microsoft Remote Desktop

Figure 205: Microsoft Remote Support

From local PC. Enter computer name or IP address of the remote ECA.

Figure 206: Trueblue Remote Support (1 of 2)

NOTE: You will require to port forward in your router to allowed Remote Desktop to be accessible via internet. Default port is 3389

11.2 Chrome Remote Desktop

This option allows you to access your ECA remotely from your PC/Laptop using your own Google account without require any port forwarding setting in the router. Before begin, Chrome Remote Desktop work in both Google Chrome or Microsoft Edge Browser, at the address bar type: <https://remotedesktop.google.com/access> then follow the directions to enabled Chrome Remote Desktop in your browser.

11.2.1 Setup ECA into your Chrome Remote Desktop

In your PC/Laptop, run Chrome/Edge and enter <https://remotedesktop.google.com/headless>

Figure 207: Chrome Remote Desktop (1 of 6)

1. Click 'Begin'

Figure 208: Chrome Remote Desktop (2 of 6)

2. Click 'Next'

Figure 209: Chrome Remote Desktop (3 of 6)

3. Click 'Authorize'

Figure 210: Chrome Remote Desktop (3 of 6)

4. Copy command for Windows (Cmd)

Figure 211: Chrome Remote Desktop (4 of 6)

5. From the ECA machine, go to Support. Under 'Chrome Remote Desktop', click setup

Figure 212: Chrome Remote Desktop (5 of 6)

6. Paste the command and enter 6-digit PIN number as a password.

Figure 213: Chrome Remote Desktop (6 of 6)

11.2.2 Accessing ECA via Chrome Remote Desktop

1. From the ECA will be remote. Make sure the service status Started

Figure 214: Accessing ECA via Chrome Remote Desktop (1 of 4)

2. From remote machine. Run web browser enter <https://remotedesktop.google.com/access/>. Click on remote devices.

Figure 215: Accessing ECA via Chrome Remote Desktop (2 of 4)

3. Enter 6-digit PIN previously set during setup to start login

Figure 216: Accessing ECA via Chrome Remote Desktop (3 of 4)

4. Access the ECA

Figure 217: Accessing ECA via Chrome Remote Desktop (4 of 4)

12 About

12.1 Machine Information

The ECA information display here such as Model, Serial Number, ecaOS version, Up time, when last reboot.

The IP address will be display if the ECA connected to local LAN.

Machine Information	
Machine Name	TestBed-H
Full Model Code	ECA-FX44E4C-15HS000000000
Serial Number	DC201809140003
Model	ECA-FX44E4C
ecaOS Version	6.1.2304.1318
Manufacturer	GSF Corporation
Private IP Address	10.0.0.144, 192.168.1.217
Public IP Address	202.190.247.241 
Machine Time	28 April 2023, 14:30 (UTC+08:00) Kuala Lumpur, Singapore
ecaOS Up time	4 hours 44 minutes
ecaOS Last Reboot	28 April 2023, 9:46

Figure 218: Machine Information

12.2 Heartbeat Information

The Heartbeat is around the clock hardware safeguard. Its micro controller overlooks the whole hardware platform to ensure continuous operation even in the event of critical breakdown.

'Factory Layer Last Saved' (Hard Reset) & Deployment Layer Last Saved' (Soft Reset) it shows the date of the layer saved.

Heartbeat Information	
Factory Layer Last Saved	19 April 2023, 16:23
Deployment Layer Last Saved	19 April 2023, 17:35
Heartbeat Model	HB2000-A1
hbOS Version	1.0.2302.1709
Heartbeat Serial Number	1838B29
Heartbeat Private IP Address	10.0.0.102
Heartbeat Last Reboot	28 April 2023, 9:05

13.5 Session Shield

13.5.1 Warning Status

Dashboard

The dashboard shows the Session Shield status for device DC201809140003. It includes a pie chart for storage usage (Available: 1568 MB, Used: 6415 MB, Total: 7983 MB) with a 'Warning' status at 80.4% used. Below the chart, it shows 'Session Shield' is 'Activated' with 'Reboot Required' as 'No'. There are buttons for 'Deactivate', 'Reboot', 'Add Exclusion' for files/folders, and 'Add Exclusion' for registry keys. A list of 'Allowed Files and Folders' is also visible.

Notification

Session Shield at warning state
Shield has reached Warning state. 19.7% (1573 MB) remaining before system becoming unstable

[DC200012340007 Testbed-G] Hard disk replace acknowledged

ECA Notifications

Tor • keong

Wed 6/25/2025 11:28 AM

Dear user,
Replacement of old disk with hard disk WDC WD2500AAKX-75U6AA0 (WD-WMC2F0265775) in Bay 2 has been acknowledged.
Time reported: 25-Jun-25 11:28:16 +08:00
Model: WDC WD2500AAKX-75U6AA0
Serial Number: WD-WMC2F0265775
Size: 232.9GB

13.8 Log

13.8.1 ECA reboot more than 3 times

Figure 220 Show chronological events in log when ECA reboot more than 3 times within 1 hour

Time	Level	Source	Type	Name	Details
21 Oct 2022, 17:15:16	Information	Heartbeat	I/O	DO0 output set to high	
21 Oct 2022, 17:15:15	Warning	Heartbeat	ECA Controller	Unauthorized system reboot	
21 Oct 2022, 17:15:14	Warning	Heartbeat	ECA Controller	Alert on: System repetitive reboot	

Figure 220

13.8.2 AC Power loss

Figure 221 Show chronological events in log when AC power loss.

Time	Level	Source	Type	Name	Details
21 Oct 2022, 17:10:44	Information	Heartbeat	ECA Motherboard	System in ecaOS	
21 Oct 2022, 17:10:43	Information	Heartbeat	ECA Gateway	Gateway connected	
21 Oct 2022, 17:10:24	Information	Heartbeat	I/O	DO0 output set to low	
21 Oct 2022, 17:10:23	Information	Heartbeat	ECA Controller	Alert off: Unexpected system power loss	
21 Oct 2022, 17:10:23	Information	Heartbeat	ECA Motherboard	System powered up	
21 Oct 2022, 17:10:21	Information	Heartbeat	Battery	Battery charging	
21 Oct 2022, 17:10:18	Information	Heartbeat	Battery	Charger power resumed	
21 Oct 2022, 17:10:18	Information	Heartbeat	ECA Motherboard	AC power resumed	
21 Oct 2022, 17:10:17	Warning	Heartbeat	ECA Gateway	Gateway disconnected	
21 Oct 2022, 17:10:16	Warning	Heartbeat	Battery	Charger power loss	
21 Oct 2022, 17:10:15	Information	Heartbeat	Battery	Battery discharging	
21 Oct 2022, 17:10:10	Information	Heartbeat	I/O	DO0 output set to high	
21 Oct 2022, 17:10:09	Warning	Heartbeat	ECA Controller	Alert on: Unexpected system power loss	
21 Oct 2022, 17:10:09	Warning	Heartbeat	ECA Motherboard	AC power loss	
21 Oct 2022, 17:05:32	Warning	Heartbeat	ECA Controller	Unauthorized system reboot

13.8.8 Force shutdown by pressing power (heartbeat) button

Figure 227 Show chronological events in log when force shutdown by long pressed power button

Time	Level	Source	Type	Name	Details
21 Oct 2022, 16:51:40	Information	Heartbeat	ECA Motherboard	System in ecaOS	
21 Oct 2022, 16:51:37	Information	Heartbeat	ECA Gateway	Gateway connected	
21 Oct 2022, 16:51:22	Information	Heartbeat	ECA Motherboard	System powered up by Heartbeat	
21 Oct 2022, 16:51:19	Warning	Heartbeat	ECA Gateway	Gateway disconnected	
21 Oct 2022, 16:51:12	Warning	Heartbeat	ECA Controller	Unauthorized system shutdown	
21 Oct 2022, 16:51:12	Information	Heartbeat	ECA Motherboard	System power button released	
21 Oct 2022, 16:51:12	Information	Heartbeat	ECA Motherboard	System forced shutdown	

Figure 227

13.8.9 Accessing Dashboard using Security Key

Figure 228 Show chronological events in log when accessing dashboard using security key

Time	Level	Source	Type	Name	Details
21 Oct 2022, 16:46:02	Information	ecaOS	Security Key	Paired security key inserted	Paired security key 'Security Key' (56a30456) was inserted
21 Oct 2022, 16:46:02	Information	ecaOS	Security Key	Security key inserted	Security key 'Security Key' (56a30456) was inserted

Figure 228

13.8.10 Accessing Dashboard using Virtual Security Key

Figure 229 Show chronological events in log when accessing dashboard using Virtual security key

Time	Level	Source	Type	Name	Details
21 Oct 2022, 16:29:32	Information	ecaOS	Virtual Security Key	Valid passcode entered	Login using virtual security key 'admin'

Figure 229

13.8.11 Add new Security Key

Figure 230 Show chronological events in log when add new security key.

Time	Level	Source	Type	Name	Details
21 Oct 2022, 15:47:38	Information	ecaOS	Security Key	Security key added	New security key 'Security Key' (56a30456) was added

Figure 230

13.8.12 Delete paired Security Key

Figure 231 Show chronological events in log when paired Security Key deleted.

Time	Level	Source	Type	Name	Details
21 Oct 2022, 15:47:29	Information	ecaOS	Security Key	Security key deleted	Security key 'Security Key' (56a30456) was deleted

Figure 231

13.8.13 Delete Virtual Security Key

Figure 232 Show chronological events in log when existing Virtual Security Key deleted.

Time	Level	Source	Type	Name	Details
21 Oct 2022, 15:53:02	Information	ecaOS	Virtual Security Key	Virtual security key deleted	Virtual security key 'admin' was deleted

Figure 232

13.8.14 Add Virtual Security Key

Figure 233 Show chronological events in log when new Virtual Security Key added.

Time	Level	Source	Type	Name	Details
25 Aug 2022, 12:56:45	Information	ecaOS	Virtual Security Key	Virtual security key added	New virtual security key 'adminv2' was added

Figure 233

13.8.15 Open ECA cover chassis

Figure 234 Show chronological events in log when ECA top cover open.

Time	Level	Source	Type	Name	Details
21 Oct 2022, 15:57:58	Information	Heartbeat	I/O		DO0 output set to high
21 Oct 2022, 15:57:58	Warning	Heartbeat	ECA Controller		Alert on: Unauthorized chassis opened
21 Oct 2022, 15:57:58	Warning	Heartbeat	ECA Motherboard		System chassis opened

Figure 234

13.8.16 Close ECA cover chassis

Figure 235 Show chronological events in log when ECA top cover close.

Time	Level	Source	Type	Name	Details
21 Oct 2022, 16:38:20	Information	Heartbeat	I/O		DO0 output set to low
21 Oct 2022, 16:38:15	Information	Heartbeat	ECA Controller		Alert off: Unauthorized chassis opened
21 Oct 2022, 16:38:15	Information	Heartbeat	ECA Motherboard		System chassis closed

Figure 235

13.8.17 PSU Status

Figure 236 Show chronological events in the log when a power supply fault is detected and the power supply is restored to normal.

Time	Level	Source	Type	Name	Details
22 Jan 2024, 12:11:02	Warning	Heartbeat	ECA Power Supply	Power supply fault	PSU 2 fault detected
22 Jan 2024, 12:10:02	Information	Heartbeat	ECA Power Supply	Power supply back to normal	
22 Jan 2024, 12:09:02	Warning	Heartbeat	ECA Power Supply	Power supply fault	PSU 1 fault detected
22 Jan 2024, 12:08:02	Information	Heartbeat	ECA Power Supply	Power supply back to normal
